(57) **ABSTRACT**

The present invention is directed to, inter alia, devices and methods for precision installation of elevator wall panels and intervening reveal strips in an elevator cab shell. Various embodiments comprise corner stays and intermediate stays with pre-installed clips thereon and with locating means installed thereon to facilitate accurate locating of adjacent stay(s) in order to greatly reduce the labor and time required to install the wall panels accurately. Further, various embodiments comprise pre-installed reveal strips on the stay(s) and that are interposed between each installed wall panel. Pre-installing the reveal strips further reduces the labor and time required at the installation site.
